

Turning 80? Come See Us at DMV! Effective July 1, 2004, drivers age 80 or older are required to appear in person at DMV and pass a vision screening to renew their driver's licenses.

You may have your vision screened at DMV or present a report from an ophthalmologist or optometrist certifying that you've met the vision requirements to hold a Virginia driver's license. A doctor's report must have been issued within 90 days of your driver's license renewal.

#### Driver's License Vision Requirements

With or without corrective lenses, a person's vision must be 20/40. If a person has vision problems in one eye, an individual must see 20/40 with the other eye, with or without corrective lenses.

#### Don't Let Your License Expire

If you allow your license to expire, you will be required to provide proof of legal presence to renew. Legal presence means that a person is either a United States citizen or is legally authorized to be in the U.S. Legal presence can be proved using an official U.S. birth certificate or a valid or expired U.S. passport. It can also be proved using a variety of other documents, such as a Certificate of Citizenship, Resident Alien Card or valid foreign passport with a VISA, I-94 or I-94W from a participating country.
